

# Stella Central

A horizontally integrated control platform leveraging all the Stella orchestration modules to provide independent network visibility, configuration management and risk identification.

## Stella Central Deliverables

Inventory report of network devices discovered, including OEM, model, hostname, serial number, firmware version, EOL date, approved-hardware status, and warranty status

- Unidentified active device report
- Report the results of all compliance checks against the documented configuration standard, EOL and approved-hardware list
- Audit logging of actions including report runs and change to sites, device configuration, and standards
- Details of configuration changes that were made and who committed the change
- Notifications (email/Slack/SMS/Teams)
- Point-in-time reporting including Asset Inventory, Port Mapping, and Cabling Matrix documents
- Monitoring alerts via tickets in your incident response system
- Monitoring status dashboard and diagnostics reporting

The Primary Customer can extract their own network reports

- Service Providers can be limited to the networks that they manage via Primary Customer SSO.

## Stella Requirements

### Requirements to run Discovery/Compliance/Configuration\* and Monitoring modules and leverage Stella Central

- Stella Instance with an enterprise licence
- Provision target networks
- \*Order Stella Relay per target network
- \*Install Stella Relay on the target network

\* not required for Configuration

### Technical information to provision a Network for Stella Relay deployment

- Open outbound internet access on dedicated untagged VLAN (recommend VLAN 120)
  - TCP/443 to Stella VPN
- Unrestricted Layer 2 access and details of target VLANs, including
  - VLAN tag
  - Static IP address and subnet mask
- Active device credentials - SSH or API access to
  - Firewalls
  - Switches
  - Wireless controller

## Stella credentials

- SOC II
- CyberCX
  - 6 monthly attestation for Stella Relay and Portal
- SNMP v3 encryption activated for ServiceNow

### Patents:

- U.S. Patent Application No. 18/134,877
- Australian Provisional Patent Application No. 2022901013
- European Patent Application No. 23168068.
